CONTENTS

v-vii **WELCOME ADDRESS**
CAPTAIN R. C. THATCHER, JR., USN
Weapons Program Management Officer, U. S. Naval Missile Center

A **UNDERWATER OPTICS**

I **PRINCIPLES OF UNDERWATER LIGHTING**
S. Q. DUNTLEY
Director, Visibility Lab., Scripps Institution of Oceanography

II **UNDERWATER EXPERIMENTS ON THE POLARIZATION, COHERENCE, AND SCATTERING PROPERTIES OF A PULSED BLUE-GREEN LASER**
G. D. GILBERT, TOM STONER & J. L. JERNIGAN
Photophysics Branch, U. S. Naval Ordnance Test Station

III **IMPROVEMENT OF UNDERWATER VISIBILITY BY REDUCTION OF BACKSCATTER WITH A CIRCULAR POLARIZATION TECHNIQUE**
G. D. GILBERT & J. C. PERNICKA
Photophysics Branch, U. S. Naval Ordnance Test Station

IV **LIGHT SCATTERING IN THE SEA**
E. M. THORNDIKE & MAURICE EWING
Lamont Geological Observatory, Columbia University

V **UNDERWATER ILLUMINATION & IMAGING MEASUREMENTS**
FRANK W. REPLOGLE
Perkin-Elmer Corporation

B **ADVANCED TECHNOLOGY**

VI **OPTIMIZATION OF OPTICAL SENSORS FOR DEEP SUBMERGENCE APPLICATIONS**
R. T. HODGSON
U. S. Naval Ordnance Test Station

VII **APPLICATION OF A LASER SCANNING AND IMAGING SYSTEM TO UNDERWATER VIEWING**
ALBERT W. ANGELBECK
United Aircraft Research Laboratories

VIII **EXTENDED RANGE UNDERWATER VIEWING SYSTEMS**
RICHARD E. MARTIN
Autonetics Div., North American Aviation Inc.

IX **UNDERWATER RANGE-GATED PHOTOGRAPHY**
PAUL J. HECKMAN, JR.
U. S. Naval Ordnance Test Station

X **UNDERWATER DETECTION AND CLASSIFICATION SYSTEM**
A. IMMARCO & T. OIGARDEN
Kolisman Instrument Corporation
